Twin Disc Brushes

The scrub deck of the Abila scrubber features two counter rotating brushes. The brushes help propel the machine in a straight line for better forward movement and less torque typically associated with single disc 20" scrubbers.

Excellent Pick Up

The squeegee system on the Abila offers excellent recovery. Both the pitch and the down pressure are easily adjusted by the operator. Squeegee assembly is fitted with two wheels which provide better stability during operation. The squeegee blade itself is reversible which doubles the life of the blade. There are also no tools needed to change the blade.
