Solution heater	1750 watt, available only on NUI3CE400H
Warranty	12 - 3 warranty
Includes	12" double bend 2 jet 20' solution & vacuum hoses

Power

Commercial carpet cleaning requires tough, durable and reliable machines and the NuSource brand of canister carpet extractors are just that machines you need. Options include a 100 PSI pump for easy to use, dependable performance or choose the 400 PSI unit for powerful injection of the cleaning solution. Standard dual vacuum motors provide over 160" of static water lift, generating enough power to extract soil and solution from deep within the carpet.

Versatility

The NUI3CE400 and NUI3CE400H extractors allow adjustments to the solution pressure setting for the cleaning of carpets, upholstery or delicate fabrics. Simply adjust the front mounted pressure gauge to the desired PSI setting and your NuSource extractor is ready for any carpet cleaning task. Large 12" non marking wheels, front mounted carry handle and a rear wheeled handle make stair climbing, transporting and loading/unloading the machine very easy.

Features

The recovery tank incorporates a clear lid for observing the recovered water level and the automatic float shut off keeps water or foam out of the vacuum motors. A unique 'clam shell' design allows access to the solution pump and solution heater while a removable access panel allows easy access to the vacuum motors. A snap lock system in the front of the machine keeps the wand securely attached to the machine for maximum portability.
