Transaxle Drive

A transaxle drive motor propels the machine forward and backward. The variable speed drive allows the operator to burnish at a slower speed for deep restorative burnishing or at a higher speed for daily maintenance.

Dust Management System

The passive dust management system utilizes the spinning of the pad and a fine bristle skirt assembly to channel dust, pad fibers and fractured floor finish into a disposable bag. The spinning pad generates a tremendous amount of air movement for very effective dust management.

- Fast and effective in maintaining the 'wet look'
- Permanently mounted flexible pad driver
- Adjustable head pressure
- Convenient left or right handed thumb switch controls machine operation
- Digital battery gauge, hour meter key switch & parking brake
- Head comes off floor when stopped
- 24 volt battery system, available with optional maintenance free batteries
